H. C. ATTERBURY,

W. R. McGREW, Auctioneer.

C. SMUTZ, Clerk

About the Best Stove on Earth To-day!

Here Is Where The Draft Enters

The most perfect draft ever discovered is the patent Hot Blast Down Draft of the Wilson Heater. The only draft that secures perfect combustion and prevents waste.

This draft is found only in the **Wilson HOT BLAST Heater**

The air enters at the top, drives the combustible gases into the fire where they are burned—prevents the escape of heat up the chimney—doubles the heating power of the fuel.

In other words, get half the amount of fuel to heat a room as you would with an ordinary heater. The Wilson Hot Blast Heater is the only one that can be held 24 hours.

Keytesville Lumber Comp'y

IS SOLE AGENT FOR THE

Wilson Hot Blast Heaters

Be sure to see them before you purchase elsewhere.

Also a line of Shelf and Builder's Hardware.

Keytesville Lumber Co., Keytesville, Mo.

Build the Fire Upside Down

There is no better way to illustrate the wonderful action of the Down Draft in the Wilson Hot Blast Heaters.

Put the coal on the bottom, then the wood, and the paper or shavings on top—light from the top and see the Down Draft work.

WILSON HOT BLAST HEATERS

are the only ones made employing this new principle.

All the gases are forced down into the fire, where they are burned, doubling the heating power of the fuel. There is practically no waste up the chimney—the coal is entirely consumed and burned to fine dust.

The Wilson, being air-tight, will hold a fire 36 hours, and perfect combustion is made possible.

We shall be glad to show them and explain the fuel-saving Down Draft.
